“My internship was amazing; I was able to learn many hands-on techniques and help out with a research project in an exercise physiology lab. I couldn’t have asked for a better job and I feel that this experience will be very beneficial to me in the future.” **Elizabeth F. University of Massachusetts – Amherst, Intern in Dublin**

**United Family Hospital**: United Family Healthcare is an international healthcare organization in China, whose sole mission is providing healthcare services in a uniquely warm and caring patient and family service environment. Interns at this organization have worked with the corporate social responsibility director inside the hospital. Other tasks include shadowing nurses and doctors, along with learning about the different daily operations of a large Chinese-Western hospital.

**Shanghai East International Medical Center**: Interns can gain clinical laboratory experience while you examine biopsies and evaluate blood work. Medical Interns closely shadow the hospital and clinic staff.

**The American Heart Association in China**: The Chinese American Heart Association (CnAHA) was founded by a group of U.S. cardiovascular physicians and scientists with Chinese origins. This internship will broaden interns understanding of Western cardiovascular practices and aspects of ancestral Chinese medicine.
